

INSTITUTE DESIGNATIONS AND COLLEGE DEGREES: FIND OUT HOW TO ATTAIN BOTH

The Institutes have agreements with colleges and universities that let you gain undergraduate and graduate credit for CPCU and IIA courses. If you are pursuing or are considering a college degree, these agreements could be of tremendous benefit to you. Think about it. Save time and money by applying your CPCU and IIA courses to a college degree. The schools with which the Institutes have agreements offer their courses online or through other flexible methods. So you can study any college courses you need when it's convenient for you. You need not choose between earning a professional designation from the Institutes and attaining a college degree.

Take a few minutes to review the information on the next page about the fully accredited institutions of higher learning with which the Institutes have partnered. Then visit the institution's Web site for more information.

Graduate
